

Release Notes

No	Module / Function	Version	Type of adjustment	Release Notes
42725	Assessments	v5.3	Fix	It has been ensured that an assessment can be edited in a draft process version.
50990	Assessments	v5.3	Fix	It has been ensured that a matrix position without a value on an assessment does not result in an error.
47343	Basic	v5.3	Improvement	The button design in IMS has been unified.
50979	Business Process Engine	v5.3	Improvement	The tables "Work in progress" and "Completed" on process execution tabs have been replaced.
51291	Business Process Engine	v5.3	Improvement	The display of configuration information on an interval tab has been improved.
51676	Business Process Engine	v5.3	Feature	For process execution object types, the "Allow assignments" checkbox can be used to specify whether such process executions can be assigned to other objects. For versioned objects, the "Confirmation by version" checkbox can be used to specify whether a confirmation must be made for each new version.
46033	Business Process Engine	v5.3	Improvement	An icon is provided by default for new measure object types.
52904	Business Process Engine	v5.3	Improvement	The authorization process for sub-objects on a non exclusive step of a process execution has been improved.
39211	Business Process Engine	v5.3	Feature	A workflow PDF containing the most important configuration information is now available.
27073	Content documents	v5.3	Fix	The Attachment tab of a content document is now also displayed if only linked documents are included.
45269	Cubes	v5.3	Feature	Organizational units can now also be selected for the Favorites cube.
47101	Cubes	v5.3	Modification	Users can now add their user documents to the Favorites cube.
47472	Cubes	v5.3	Fix	An issue that prevented data from being displayed in the cubes has been fixed.
47680	Cubes	v5.3	Improvement	The "Type" column has been added to the activity cube.
47681	Cubes	v5.3	Feature	The cube list function has been expanded and improved.
44163	Cubes	v5.3	Improvement	The naming of the Cubes Excel lists has been improved.
49553	Cubes	v5.3	Fix	An issue regarding the size of process map cubes has been fixed.
49752	Cubes	v5.3	Improvement	The display of the cube configuration page has been improved when many items are selected.
49845	Cubes	v5.3	Fix	An issue with the sorting of the Type column in the ToDo Cube has been fixed.
50549	Cubes	v5.3	Fix	It has been ensured that all links in the Check cube lead to the check tab.
50773	Cubes	v5.3	Fix	It has been ensured that the correct step name is displayed in the ToDo Cube for each entry, especially if the step name has been changed in the meantime.
50559	Cubes	v5.3	Improvement	The display of the process tree for the Favorites cube has been improved.

50385	Design / UX	v5.3	Modification	The background color of the process arrow is already customizable via the theme. The text color can now also be changed via the theme.
50988	DocProperties	v5.3	Fix	An issue with updating DocProperties has been fixed.
53682	Documents	v5.3	Fix	An issue with context specific permissions has been fixed.
42516	Documents	v5.3	Feature	The status of an object that has been deactivated using the deactivation workflow is now displayed as "deactivated" instead of "final, not valid".
49982	Documents	v5.3	Improvement	It has been ensured that documents with a long name are shortened by an ellipsis.
50430	Documents	v5.3	Improvement	The authorization process for sub-objects of a process execution has been improved.
48116	Documents	v5.3	Improvement	The Language parameter has been added to the 4th link in the document link pop-up. This enables the document to be opened in the selected language and not in the user's language.
42608	Dynamic forms	v5.3	Improvement	It has been ensured that the view mode displays a text box with a lot of text without the scroll bar.
51804	Dynamic forms	v5.3	Fix	An issue with creating a matchcode has been fixed.
51103	Dynamic forms	v5.3	Fix	An exception has been prevented on dynamic fields where rule configuration is not possible.
51020	Educations	v5.3	Fix	On the user's education/training tab, the occurrence of an error related to checks has been prevented.
50692	Educations	v5.3	Feature	The education/training function has been replaced with the new solution "education/skills".
46694	Framework	v5.3	Modification	On the IMS status report page, it is now possible to download the configuration files.
50747	Import/Interface	v5.3	Feature	An import/export function is now available for object management solutions.
51497	Import/Interface	v5.3	Feature	There is now a transfer function that allows customers to securely transfer their data to the IMS SaaS environment.
52213	Improvement	v5.3	Fix	An issue when creating measures from templates has been fixed.
51383	Kpi	v5.3	Fix	The calculation of the bar color in the cockpit has been fixed.
51610	License management	v5.3	Fix	Every time an alternative process image was displayed somewhere (e.g. Cubes), the Process module was logged as used. This has been fixed.
48578	Object management	v5.3	Feature	In object management, the navigation bar has been updated to include child and neighboring objects.
50600	PDF creation	v5.3	Feature	The option to create a PDF from a generic data container has been added.
28022	Process	v5.3	Improvement	A warning message is displayed when a process map is deactivated.
51007	Process	v5.3	Fix	It has been ensured that the navigation bar is correct when opening a process directly from the process map cube.
45639	Process	v5.3	Fix	It has been ensured that when a standard process is removed from a map, the link to unit-specific documents is also removed.

46503	Process	v5.3	Improvement	The display of the document tab on a process map in view mode has been improved.
53145	Process	v5.3	Fix	When creating a new version of a unit-specific process, it has been ensured that synchronization with the standard process does not end in an error.
52380	Reporting	v5.3	Fix	It has been ensured that the sorting function in the Analytics evaluation pop-up works properly.
51214	Reporting	v5.3	Feature	The Analytics functionality has been enhanced and is now also used for versioned objects.
50630	Reporting	v5.3	Modification	Starting a search on the Analytics page has been improved. A search can now be started at any time by pressing the blue "Start Search" button. It is no longer necessary to close an open pop-up. It is now also possible to switch between pop-ups by simply clicking on the corresponding element. The changes in the current pop-up are automatically saved and the new pop-up is opened.
50553	Reporting	v5.3	Improvement	The lead time section on the Analytics page has been improved.
53342	Reporting	v5.3	Improvement	The title bar of the evaluation results page has been improved in connection with displaying and hiding fields.
49981	Reporting	v5.3	Improvement	The functionality of the "last search" option in the Analytics pages has been improved.
43508	Risk	v5.3	Improvement	Adding custom risk PDFs via AddOn has been improved.
47344	Risk	v5.3	Improvement	The form for the risk values has been improved.
49359	Risk	v5.3	Modification	The filter options in the risk assessments have been updated.
50656	Risk	v5.3	Fix	An issue when using the checked on date in the control definition catalog evaluation has been fixed.
44477	Risk	v5.3	Modification	With a specific configuration it was already possible to create a PDF for risk definitions. This is now also possible for risk groups.
52081	Search	v5.3	Fix	A timeout due to an endless loop when searching for documents has been prevented.
50739	Search	v5.3	Fix	It could happen that fields were displayed in the search results that were not present on this object. This has been fixed.
43684	Search	v5.3	Improvement	The Excel results of the search function have been converted to ClosedXML.
51152	User management	v5.3	Fix	It has been ensured that disabled risk ratings no longer appear on the user's integration tab.
50386	Views	v5.3	Improvement	The views configurator has been improved.
50406	WebDAV	v5.3	Feature	As of 4.0.11 a WebDAV URL contains an encrypted user token. To gain support for stored/integrated legacy links, a setting was introduced which allows the documents to be opened and edited through these links. The protected setting is to be found in the "documents" section as "Use WebDAV legacy URL".
44430	Workflow	v5.3	Improvement	It has been ensured that the "Check Workflow Permissions" setting is effective wherever workflows are used.
45866	Workflow	v5.3	Fix	An issue with process execution authorizations when exclusive permissions were assigned has been fixed.

49303	Workflow	v5.3	Improvement	The authorization check on individual steps of a creation workflow has been improved.
