# Release Notes

| No | Module / Function | Version | Type of adjustment | Release Notes |
|---|---|---|---|---|
| 48122 | Basic | v5.4 | Fix | An issue with changing the font in the e-mail editor has been fixed. |
| 46800 | Basic | v5.4 | Improvement | It has been ensured that navigation with the arrow keys is possible in an activity list in the process module. |
| 49794 | Basic | v5.4 | Fix | Existing objects that have been added to an object can now be removed. |
| 23130 | Basic | v5.4 | Feature | In addition to user groups, organizational units and authorizations, functional roles can now also be used as recipients in an e-mail. |
| 52405 | Basic | v5.4 | Improvement | The options to select a start page in IMS Premium have been enhanced. |
| 51379 | Basic | v5.4 | Improvement | Old themes have been removed and the corresponding settings text has been adjusted. |
| 37572 | Basic | v5.4 | Improvement | In the search results and evaluations, only dynamic fields for which the "Report" checkbox is activated appear. This also applies to all label fields as of this version. |
| 51334 | Business Process Engine | v5.4 | Fix | The behavior of the language drop-down list in process executions has been fixed. |
| 51505 | Business Process Engine | v5.4 | Feature | A new option is available to archive CIP events. |
| 51740 | Business Process Engine | v5.4 | Fix | An issue with the search function when adding an existing process execution has been fixed. |
| 46632 | Business Process Engine | v5.4 | Improvement | Improvements have been made to the process execution PDF, especially in connection with the display of documents and sub-objects. |
| 50215 | Checks | v5.4 | Fix | A double-click issue in the check window has been fixed. |
| 44354 | Cubes | v5.4 | Feature | A new cube framework is available, which can be used to configure customer-specific cubes. These cubes can be configured by the Competence Center on behalf of the customer. |
| 52469 | Documents | v5.4 | Modification | If the user is assigned to a specific client, it has been ensured that the correct logo is used when a document is opened outside the IMS. |
| 52415 | Documents | v5.4 | Fix | The order of the Valid from and Valid to fields in the document window has been corrected for the French language. |
| 52236 | Documents | v5.4 | Improvement | When downloading documents of a process document group, they are now downloaded with the unit-specific logo. |
| 51230 | Documents | v5.4 | Improvement | The pop-up menu for the document download has been revised and improved with regard to long file names and/or multiple languages. |
| 43478 | Documents | v5.4 | Improvement | If there is only one linked object in a search tree, the whole tree is now hidden if the "Without mappings" checkbox is selected. |
| 54163 | Documents | v5.4 | Fix | It has been ensured that the pop-up menu for deleting assignments is positioned correctly. |
| 51498 | Documents | v5.4 | Improvement | A caching issue where workflow e-mails may not be sent to all recipients has been fixed. |

# IMS PREMIUM®

| 53895 | Documents | v5.4 | Fix | In the TreeView folder view, an issue where subfolders were possibly not sorted correctly has been fixed. |
|---|---|---|---|---|
| 49962 | Dynamic forms | v5.4 | Improvement | It has been ensured that settings of a global field are applied to the local fields, with the exception of the flag "relevant for responsibilites". |
| 52850 | Dynamic forms | v5.4 | Fix | In some cases, the search in an ImsObject form field did not work properly for restricted viewers. This has been fixed. |
| 52215 | Dynamic forms | v5.4 | Fix | The authorization check when selecting from an ImsObject field has been improved. |
| 52022 | Dynamic forms | v5.4 | Fix | It has been ensured that inactive users are ignored when resolving a user group via a preset on an ImsObject field. |
| 45250 | Dynamic forms | v5.4 | Fix | It has been ensured that on the evaluations dynamic form fields with Show in = Report are correctly displayed in the Excel lists. |
| 52078 | Dynamic forms | v5.4 | Improvement | The behavior of the preset in a workflow on a versioned document has been improved so that the value of the preset is taken from the current draft version instead of from the last final version. |
| 51081 | Dynamic forms | v5.4 | Improvement | The positioning and display of the selection pop-up for ImsObject fields on a form has been improved. |
| 51109 | Dynamic forms | v5.4 | Fix | When selecting processes in an ImsObject field, it has been ensured that only process structures and no process phases are displayed. |
| 44188 | Framework | v5.4 | Improvement | Updated texts and translations in a workflow are now immediately available. |
| 53144 | Graphical process maps | v5.4 | Improvement | The display of graphical process maps in Cubes has been improved. The graphical process map is now positioned in the center. |
| 37387 | Kpi | v5.4 | Improvement | The PDF now applies the selected filters in the Key Performance Indicators module. |
| 55401 | Object management | v5.4 | Fix | It has been ensured that the draft version of a generic data container is displayed when the change icon is clicked. |
| 51448 | Organization | v5.4 | Improvement | For viewers only the current position is displayed on the position tab. |
| 52898 | Organization | v5.4 | Improvement | The display in the organization chart has been improved when the order of organizational units is changed in the configuration. |
| 47141 | PDF creation | v5.4 | Fix | It has been ensured that an uppercase file extension (e.g. DOCX) does not cause problems when creating a PDF. |
| 51817 | PDF creation | v5.4 | Fix | It has been ensured that the correct titles are displayed in a PDF file with more than one page. |
| 51126 | PDF creation | v5.4 | Improvement | The user is prompted to try another format if a process PDF cannot be created. |
| 54290 | Performance | v5.4 | Improvement | The structure of the check cube has been revised. The information is no longer compiled live, but by a service. |
| 53359 | Permissions | v5.4 | Fix | An issue with interrupting an anonymous permission in the Process module has been fixed. |
| 51612 | Permissions | v5.4 | Fix | The sorting in the left part of the authorization window has been fixed. |
| 53529 | Permissions | v5.4 | Fix | It has been ensured that the authorization window is always displayed with all data. |
| 53552 | Permissions | v5.4 | Feature | It is possible to use position groups for authorizations and notification. |
| 47338 | Process | v5.4 | Fix | It has been ensured that a process jump can be deleted if it starts on a sub-structure. |

| 47804 | Process | v5.4 | Feature | Process PDFs now contain executable links to the included documents, document groups and processes. |
|---|---|---|---|---|
| 47988 | Process | v5.4 | Fix | It has been ensured that direct translation of inputs/outputs is possible on the description tab of a process. |
| 51935 | Process | v5.4 | Fix | It has been ensured that a unit-specific process editor does not have change rights on a standard document group. |
| 52029 | Process | v5.4 | Improvement | Control definitions linked to a process are now also displayed in a draft version. |
| 53686 | Process | v5.4 | Fix | It has been ensured that document groups are opened with the correct layout when opened in a process. |
| 51739 | Reporting | v5.4 | Fix | The date check in the control definition evaluations has been fixed. |
| 46746 | Reporting | v5.4 | Fix | The display of selection fields (e.g. Calendar or Select) has been improved in the Analytics evaluations. |
| 52032 | Reporting | v5.4 | Fix | An error which could occur if the same name appeared more than once when creating evaluations has been fixed. |
| 54393 | Reporting | v5.4 | Improvement | It has been ensured that sub-processes are always displayed in Analytics evaluations. |
| 53517 | Risk | v5.4 | Fix | It has been ensured that master data entry is not affected with risk multi-client capability. |
| 49020 | Risk | v5.4 | Feature | The Risk module is now multi-tenant capable. |
| 49847 | Risk | v5.4 | Fix | It has been ensured that the connection between portfolio graphic and the legend is reliable when using the scrollbar. |
| 42611 | Search | v5.4 | Fix | An issue in the search function that could occur when permissions were suspended in shared documents assigned in a process has been fixed. |
| 53146 | Search | v5.4 | Fix | In some cases, an issue where a search without changing the search parameters led to different results has been fixed. |
| 53415 | Search | v5.4 | Fix | An issue has been fixed with too many parameters in the quick search function. |
| 53487 | Search | v5.4 | Fix | An issue that prevented the search page from being opened from the menu has been fixed. |
| 55320 | Search | v5.4 | Fix | An issue with incorrectly placed entries in the Search results has been fixed. |
| 55577 | Search | v5.4 | Improvement | An improvement has been made to the quick search for numbers (counter values) using the search box at the top right. |
| 30269 | Search | v5.4 | Feature | If a process is used in different process maps, a pop-up menu is displayed when the process is opened via the search page. The desired map can be selected there. |
| 52888 | Standards and law management | v5.4 | Improvement | It is now possible to assign a standard either unit-specifically for one process map only, or to make it available to all units via the standard process. This assignment can also be changed if necessary. |
| 49771 | User management | v5.4 | Fix | The scrollbars in the user administration have been improved. |
| 50389 | Views | v5.4 | Improvement | An improvement that prevents unnecessary scrollbars has been implemented in process views. |
| 13626 | Workflow | v5.4 | Fix | If exclusive rights have been defined on a workflow step, it has been ensured that no one else has an editing option (e.g. the editor can no longer upload a new document). |
| 41691 | Workflow | v5.4 | Feature | With the new workflow service "WorkflowTrigger", the option has been created to check all open workflows to see if they can be forwarded to the next step. |

| | | | | The following conditions must be met:<br>− All rules are met to execute the next step<br>− The next step has no user interaction or all possible user interactions have already taken place<br>− There is only one way to continue the workflow and this way can be followed automatically |
|---|---|---|---|---|
| 56131 | Workflow | v5.4 | Fix | An issue in the workflow configuration that caused some fields to be duplicated or triplicated on rules after inserting a new step has been fixed. |
| 53924 | Workflow | v5.4 | Fix | Authorizations for workflow outputs were not included in the version. This has now been fixed. |
| 52174 | Workflow | v5.4 | Fix | An issue with newly added mandatory fields when the object is to be disabled has been fixed. |
| 52031 | Workflow | v5.4 | Fix | An issue that occurred with a field that can only become mandatory due to a rule has been fixed. |
| 51584 | Workflow | v5.4 | Improvement | Buttons on which a time rule is defined are no longer displayed to the user, since they are managed by the system. |
| 50259 | Workflow | v5.4 | Fix | It has been ensured that the first entry in the sub-object list can be selected in the workflow configurator page. |
| 50216 | Workflow | v5.4 | Fix | Changing a checkbox could result in an error in the workflow configuration. |
