IMS PREMIUM®

Release Notes

No	Module / Function	IMS Version	Type of adjustment	Release Notes
1782	Basic	v2024.2	Fix	An issue where IMS Premium could not be opened in Safari has been fixed.
1986	Basic	v2024.2	Fix	An issue with the function "Email texts" under Global settings has been fixed.
2060	Basic	v2024.2	Fix	An issue where documents and task lists could not be translated correctly has been fixed.
1955	Business Process Engine	v2024.2	Fix	An issue with an error message in a process execution has been fixed.
475	Checks	v2024.2	Fix	An issue with incorrect date interpretation in connection with the "Default Culture" setting has been fixed.
495	Cubes	v2024.2	Improvement	Pop-up sizes for Cubes have been unified.
396	Cubes	v2024.2	Modification	In a configurable cube, deadline fields whose contents are older than the current date are now displayed in red.
1971	Documents	v2024.2	Fix	An issue where a document could no longer be opened if the user changed the language has been fixed.
2054	Documents	v2024.2	Fix	An issue where the document download didn't work in Firefox has been fixed.
2047	Dynamic Forms	v2024.2	Fix	An issue with the display of collapsed/expanded labels and the corresponding fields has been fixed.
1911	Dynamic Forms	v2024.2	Fix	An issue where an object was no longer editable after removing multi-select entries has been fixed.
1486	Educations	v2024.2	Feature	It is now possible to assign users, in addition to positions, to an education object.
2030	Educations	v2024.2	Improvement	An issue with the calculation of the valid-to date for multi-level confirmations has been fixed.
2120	License Management	v2024.2	Improvement	The logged module usage is now displayed in a new tab in the IMS Help pop-up. The tab is accessible for all super users.
2183	License Management	v2024.2	Improvement	For superusers the new "IMS usage" tab is displayed in the IMS help pop-up window. It shows the usage for the last 26 months.
2071	Modeler	v2024.2	Fix	An issue with missing connection arrows in swimlane graphics has been fixed.
1686	Performance	v2024.2	Improvement	The resolution of workflow authorizations have been improved in terms of performance, especially for workflow steps with a large number of authorizations that have already been run through.

1469	Performance	v2024.2	Feature	As search queries in object management can take a long time, a new search index table has been implemented. All contents of dynamic fields with the configuration flag "IncludeInSearchIndex" are resolved and saved in this table using a service task. This allows the search to be carried out very efficiently. Note: The configuration flag has been renamed. It used to be called "TreeSearch". The search term must begin with * if the word you are looking for is not at the beginning.
1689	Process	v2024.2	Fix	Some issues where the SVG graphic was not displayed in the task list have been fixed.
2002	Process	v2024.2	Improvement	Swimlane titles in process view have been improved.
1958	Process	v2024.2	Fix	An issue where there was a mismatch between the graphic and the description in activity lists has been fixed.
1987	Search	v2024.2	Fix	An issue with the function "Search from" has been fixed.
1916	Workflow	v2024.2	Fix	An issue with the auto execute connection rule has been fixed.
1952	Workflow	v2024.2	Fix	An issue where the release workflow didn't work has been fixed.
1954	Workflow	v2024.2	Fix	An issue with an error in the recipient selection on the workflow reminder has been fixed.
2108	Workflow	v2024.2	Fix	An issue with a rule depending on SELECT from previous step has been fixed.
