

Release Notes

No	Module / Function	IMS Version	Type of adjustment	Release Notes
1442	Basic	v2024.3	Fix	Using SharePoint and Azure in combination could cause IMS to be inaccessible due to an authentication issue. This has been fixed.
1998	Business Process Engine	v2024.3	Fix	An issue where proofs could no longer be deleted has been fixed.
2194	Business Process Engine	v2024.3	Improvement	It has been ensured that manually created measures are correctly attached to the main object.
2125	Documents	v2024.3	Fix	An issue with confirmations of objects which were final but not yet valid has been fixed.
1973	Documents	v2024.3	Improvement	An issue where the URL of a document was too long for editing in WebDAV has been fixed.
799	Dynamic Forms	v2024.3	Fix	When dynamic fields from a workflow output are used for automatic notification, the id of the field is now updated in every case. Previously it depended on whether "meta" or "metawf" was used in the inform text.
1339	Dynamic Forms	v2024.3	Fix	An issue with the matchcode update in draft versions has been fixed.
2323	Dynamic Forms	v2024.3	Fix	An issue with filling IMS Object fields via preset on the same step has been fixed.
2251	Object Management	v2024.3	Fix	An issue where the wrong user window was opened for confirmations has been fixed.
1569	Permissions	v2024.3	Modification	It has been ensured that a language editor can change a document in the respective language without having full editor authorization.
1939	Process	v2024.3	Fix	An issue with the process comparison function has been fixed.
1951	Process	v2024.3	Fix	An issue where process containers could no longer be opened by clicking on them has been fixed.
2124	Process	v2024.3	Fix	An issue with the display of swimlane views when users are used instead of jobs has been fixed.
1356	Process	v2024.3	Fix	An issue where it was not possible to add process jumps has been fixed.
2167	Process	v2024.3	Fix	An issue where there was a mismatch between the graphic and the description after re-sorting of outputs in activity lists has been fixed.
2275	Process	v2024.3	Fix	An issue where the checkbox "Text in picture" did not work in the activity list view has been fixed.
2270	Reporting	v2024.3	Fix	An issue where the confirmation page was not completely visible in analytics has been fixed.
2066	Reporting	v2024.3	Improvement	An issue with the Excel export when the cube name contains special characters has been fixed.

701	Risk	v2024.3	Improvement	It has been ensured that the field risk identification is included in the analysis.
702	Risk	v2024.3	Fix	An issue where the report flag on risk fields was not considered has been fixed.
703	Risk	v2024.3	Improvement	In the Risk Catalog report, the comment of the evaluation is now also displayed in the results list and the Excel export.
704	Risk	v2024.3	Improvement	On the risk catalog analytics page, new filters “Only risk definitions” and “Only risk groups” have been included.
2335	Standards and Law Management	v2024.3	Improvement	With the corresponding setting, the standards and laws chapter number can now be displayed before the name in forms.
2254	User Management	v2024.3	Fix	An issue with an error in the open confirmation expander in the user window has been fixed.
2129	Views	v2024.3	Fix	An issue where the final view was not the same as the draft view has been fixed.
2084	Views	v2024.3	Fix	An issue with a blank task in a task list has been fixed.
2296	WebDAV	v2024.3	Fix	An issue where an error message was displayed when opening a document via WebDAV has been fixed.
2320	Workflow	v2024.3	Fix	An issue where meta fields were not resolved in reminder emails has been fixed.
2200	Workflow	v2024.3	Improvement	Date connection rules have been enhanced. References to a dynamic date field can now also be used.
804	Workflow	v2024.3	Improvement	Several issues with the workflow import/export function have been improved, enhanced or fixed.
