

Release Notes

No	Module / Function	IMS Version	Type of adjustment	Release Notes
2417	Cubes	v2024.4	Improvement	Improvements in News cube:a) It has been ensured that a functioning link is included in the Excel export. b) The column "Reason for edit" has been added.
2438	Documents	v2024.4	Fix	An issue with RoleResolver authorizations if rights to document groups were not inherited has been fixed.
2460	Documents	v2024.4	Fix	An issue where empty fields could be filled in a final version has been fixed. This was possible under the following conditions: 1) A valid version of the document existed, but not all existing fields were filled 2) A draft version of the document was created 3) The draft version was opened in two windows at the same time 4) The draft version was deleted in one window 5) One or more of the empty fields were entered in the other window
2396	Dynamic Forms	v2024.4	Fix	An issue with resolving ImsObject presets has been fixed. The issue could occur with extensive use of DynamicPresets in ImsObject fields.
2205	Modeler	v2024.4	Improvement	Version information is now also displayed in the modeling window.
1957	Modeler	v2024.4	Fix	An issue where the field "Changes since the last version" was not editable in a process has been fixed.
2103	Object Management	v2024.4	Fix	Some issues where the change icon was missing have been fixed.
2366	Object Management	v2024.4	Modification	The behavior of which GDCs may be created in change mode of a versioned GDC has been improved.
2434	Object Management	v2024.4	Fix	An issue with the authorizations for generic data containers has been fixed.
2420	PDF Creation	v2024.4	Fix	An issue with the display of certain characters in the process path of an activity list PDF has been fixed.
188	Performance	v2024.4	Improvement	An issue where the object type master data page loaded slowly due to the large number of deletable items has been fixed.
2525	Permissions	v2024.4	Fix	Performance has been improved when the setting "check permissions on tree nodes" is used.
2115	Process	v2024.4	Improvement	A number of improvements to the swimlane view and the swimlane PDF have been added.
1913	Reporting	v2024.4	Fix	An issue where the confirmation analytics did not produce the expected result has been fixed.
2532	Reporting	v2024.4	Improvement	It is now possible to search for allocations in the risk aggregations of risk evaluations. Not only the direct allocations are taken into account but also those in the "additional display in" field.
2483	Reporting	v2024.4	Improvement	Expired confirmations are now more visible (with a red x) in the confirmation matrix of the Analytics page.
2500	Reporting	v2024.4	Fix	An issue where process executions were missing from the report has been fixed. This occurred when exclusive permissions were used and the responsible person was the one from the previous step.
2446	Search	v2024.4	Modification	Standard field "Reason for edit" has been added to the IMS search report.

2413	User Management	v2024.4	Improvement	Working with the user management tree has been improved especially when there are a lot of users and user groups. In this case, the selection of the user node and the display of user group assignments have been improved.
2456	Workflow	v2024.4	Fix	An issue with mandatory fields that were not checked in a confirmation workflow step has been fixed.
